I. Introduction

Berlin Hyp issues Green Bonds either as covered bonds (Green Pfandbriefe) or as senior unsecured bonds (Green Senior) and is committed to using the proceeds of these bonds for financing and/or refinancing green assets. All eligible assets are loans for green buildings. The eligible assets remain on the bank’s balance sheet. Investors do not bear the credit risk of the assets and rank pari-passu with existing covered bondholders (in the case of Green Pfandbriefe) or senior unsecured bondholders (in the case of Green Senior).

Eligible assets can form part of Berlin Hyp’s mortgage cover pool. Eligibility criteria are described in Annex 1.

II. Rationale

Sustainability is an important aspect of Berlin Hyp’s corporate strategy. In 2013, Berlin Hyp decided to systemise the bank’s existing approaches and processes in a sustainability management system. Financing green buildings represents the part of Berlin Hyp’s sustainability measures that is closest to its core business: commercial real estate lending. In order to further strengthen its green building lending, the bank introduced pricing incentives for eligible business earlier in 2016. Issuing Green Bonds represents the logical equivalent on the liability side of the bank’s balance sheet. In 2017 having a leading position in green finance was added to Berlin Hyp’s overall strategic goals: By the end of 2020, 20% of Berlin Hyp’s loan portfolio should consist of loans for green energy efficient buildings.

As buildings account for 30 to 40 per cent of total energy demand and about 30 per cent of total energy related CO₂ emissions worldwide, Berlin Hyp actively contributes to the avoidance of CO₂ emissions by financing sustainable and low energy buildings. By issuing Green Bonds it offers investors the opportunity to support these efforts to aid in the transition to a low carbon economy.

Berlin Hyp is continuously aiming for diversification in its investor base and products. Green Bonds enable environmental investors to invest in the bank’s liabilities.

With the issuance of Green Pfandbriefe and Green Senior Berlin Hyp offers investors an added value in addition to its own credit quality and/or the credit quality of its mortgage cover pool. This is enticing in an overall capital market environment of low interest rates and tight credit spreads as to date of the publication of this Green Bond Program.

Berlin Hyp is an experienced Pfandbrief issuer and offers investors maximum transparency. Due to the requirements of the German Pfandbrief Act the bank discloses detailed

1 Second update of the initial Green Bond Framework dated 8 August 2016; the section Rationale has been amended and eligibility criteria (Annex 1) have been strengthened. Changes marked with green letters.
information on its cover pool. The bank uses this experience to provide in-depth information on eligible assets to environmental investors.

With this Green Bond Program, Berlin Hyp intends to make its approach to green bond funding transparent for investors as an identical approach is to be used for all Green Bonds issued or to be issued by the bank. Under the program the bank focuses on refinancing loans for energy efficient commercial real estate and follows one single methodology for all bonds.

III. Green Bond Program

As of 28.02.2018, Berlin Hyp has a mortgage loan portfolio with a nominal value of € 20.5bn. A portion with a value of about € 3.0bn meets the bank’s eligibility criteria and is labelled green building loans in its loan monitoring system. The nominal value of green building loans in Berlin Hyp’s mortgage cover pool is € 2.0bn, while another € 1.0bn is not or not yet a part of the mortgage cover pool. The aggregated nominal value of eligible assets will change over time and is likely to increase as the bank:

a) plans to generate new eligible assets and
b) shall ask existing borrowers for sustainability certificates and energy performance certificates (EPCs).

Under this program the bank shall issue Green Pfandbriefe and Green Senior to refinance eligible assets. Berlin Hyp’s primary focus is to refinance existing green building loans. Therefore, a new Green Bond can only be issued if there are green building loans with a sufficient aggregated nominal value on the bank’s balance sheet that have not already been used for previous Green Bonds. Eligible assets shall not be allocated to more than one Green Bond of Berlin Hyp. That means that the aggregated nominal value of all outstanding Green Bonds shall not exceed the aggregated nominal value of eligible assets at any time. Furthermore, the bank shall ensure a 10 per cent excess of eligible assets at issuance of a new Green Bond. That means that the aggregated nominal amount of eligible assets has to be at least 110 per cent of the sum of the nominal values of the outstanding Green Bonds and the intended new Green Bond.

In addition, the aggregated nominal value of outstanding Green Pfandbriefe shall not exceed the aggregated eligible assets in the bank's mortgage cover pool at any time. If eligible assets mature or are redeemed before a Green Bond’s maturity they are replaced by other eligible assets. The bank will thus make every effort to ensure that the aggregated nominal value of eligible assets exceeds the aggregated nominal value of all outstanding Green Bonds at any time.

In addition, Berlin Hyp shall make every effort to invest an amount equivalent to the net proceeds of the Green Bonds in new eligible assets and (in the case of Green Pfandbriefe) to include these into its mortgage cover pool.

Berlin Hyp’s Green Pfandbriefe and Green Senior are issued as bearer bonds under its Offering Program, described in the current version of its base prospectus, which is published on the bank’s website. Eligible assets may also be refinanced by using the proceeds of registered bonds or Schuldscheindarlehen.

III.1 Green Pfandbrief

Berlin Hyp’s Green Pfandbriefe are Mortgage Pfandbriefe as defined in section 1 para. 1 (1) of the Pfandbrief Act. All cover assets fulfill the requirements of sections 13 to 18 Pfandbrief Act. Green Pfandbrief holders rank pari-passu with all other Mortgage Pfandbrief holders. In the event of issuer insolvency, the entire cover pool
is liable for timely payment of the interest and principal of Green Pfandbriefe and all other outstanding Mortgage Pfandbriefe.

The cover principle from the Pfandbrief Act is applied by Berlin Hyp to its Green Pfandbriefe. That means that a new Green Pfandbrief can only be issued if the bank’s mortgage cover pool contains sufficient eligible assets that have not already been allocated to a Berlin Hyp Green Bond. Proceeds are thus always used to refinance eligible assets in the bank’s mortgage cover pool.

In addition, the bank makes every effort to invest an amount equivalent to the net proceeds of each Green Pfandbrief in new eligible assets and include them in its mortgage cover pool. Eligibility criteria for these new assets must meet as a minimum the standard that is applicable to the assets that are already on the bank's balance sheet at issuance.

III.2 Green Senior

Investors in Berlin Hyp’s Green Senior rank pari-passu with investors in other senior unsecured notes of the bank. According to the German implementation of the Bank Recovery and Resolution Directive (BRRD), senior unsecured bonds are subordinated to deposits and can be subject to bail-in measures in a recovery or resolution scenario. A new Green Senior can only be issued if there are sufficient eligible assets on the bank's balance sheet that have not been allocated to a Berlin Hyp Green Bond before.

In addition, the bank shall make every effort to invest an amount equivalent to the net proceeds of each Green Senior in new eligible assets. Eligibility criteria for these new assets must meet as a minimum the standard that is applicable to the assets that are already on the bank's balance sheet at issuance.

Berlin Hyp's Green Bonds are not project bonds. Therefore, the bank will not assign a specific Green Bond to one or more specific projects. Eligible assets have to meet the eligibility criteria at the time they are flagged as eligible assets. If the bank decides to enhance eligibility criteria, then these new criteria are not applied retroactively to the existing eligible assets. Existing eligible assets do not lose their status if they do not meet the new eligibility criteria.
IV. Green Bond Principles

Berlin Hyp is a member of the Green Bond Principles. It aligns each Green Bond that it issues to the four core principles:

IV.1 Use of Proceeds

The proceeds of Berlin Hyp’s Green Bonds will be used to refinance eligible assets. Eligible assets means loans for the (i) acquisition or (ii) construction or (iii) refurbishment of Green Buildings as defined in Annex 1. The mortgages on these Green Buildings serve as collateral for loans on Berlin Hyp’s balance sheet. If they are used for Green Pfandbriefe the loans have to be eligible for and included in or to be included in the bank's mortgage cover pool.

IV.2 Process of Evaluation and Selection

The process of Selection and Evaluation is set up as follows:

Berlin Hyp has established a Green Building Commission (GBC). This consists of one representative from each of the following divisions of the bank: Corporate Strategy, Origination, Credit, Appraisal and Treasury. In its regular meetings the GBC discusses whether eligibility criteria (Annex 1) are still in line with market best practices of Green Building definition. If not, the GBC will discuss possible changes and decide on how to adapt the eligibility criteria. Any change shall only lead to stricter criteria, which means a lower level of energy demand and/or consumption.

At the beginning of the acquisition process, Berlin Hyp’s borrowers are being asked to provide relevant documents concerning the eligibility for the bank’s green finance portfolio, i.e. primarily EPCs and sustainability certificates. The assessment of a property’s qualification as a green building is carried out by the experts in the bank’s appraisal division. They inform the credit department about their results. Credit staff thereafter documents the property’s green building eligibility in the e-file. In case of a positive decision by the appraisers, sales staff is allowed to deduct up to 10 basis points when pre-calculating the loan.

After documentation in the e-file, Treasury is asked for their vote on the asset’s compliance with the green finance portfolio eligibility criteria and whether it should be included in Berlin Hyp's green finance portfolio. This ensures a four-eye-principle with respect to the identification process. Only loans that have been approved by both divisions, Appraisal and Treasury, are classified by credit staff as green bond eligible in the bank’s loan monitoring system. In any case, data on the properties’ energy efficiency and sustainability are entered into the loan monitoring system even if a property doesn’t fulfill eligibility criteria. As this process is applied to all new business, it is one of Berlin Hyp’s longer term targets to provide evidence about its entire mortgage loan portfolio’s energy efficiency.

IV.3 Management of Proceeds

Eligible assets already exist on Berlin Hyp's balance sheet (and in the case of a Green Pfandbrief in its mortgage cover pool) at issuance of a new Green Bond. They are not booked in a separate portfolio but flagged in the bank's legal loan monitoring system. Thus,
they form a sub-portfolio of Berlin Hyp’s overall loan book. The bank shall report on the
development of this sub-portfolio on an annual basis as described in IV.4.

IV.4 Reporting

Berlin Hyp has established a separate website which is exclusively used for providing
information about its green bonds (Green Pfandbriefe and Green Senior). The German
version of this website is to be found under www.gruener-pfandbrief.de. The English version
of the website can be found under www.green-pfandbrief.com.

Relevant documents and information concerning the bank’s green bond activities are
published on its green bond website. This also contains the bank’s reports on its green
bonds. As long as Berlin Hyp has green bonds outstanding, the bank will report on an annual
basis. Each report will contain details about:

(i) The development of eligible assets on Berlin Hyp’s balance sheet and in its
mortgage cover pool on a stratified basis

(ii) New business in eligible assets since the last report and assignment of eligible
assets to issued bonds on a loan-by-loan basis

(iii) Carbon emissions avoidance (impact reporting) evaluated in comparison to one or
more appropriate baselines.

Berlin Hyp has already published its first annual reporting which can be found on its green
bond website. Reports will remain available for investors for future reference.

V. External Review

V.1 Second Party Opinion

Berlin Hyp has appointed oekom research AG (oekom) to assess the sustainability of its
Green Bond Program. oekom applies its own framework to carry out this assessment. The
results are documented in oekom’s Second Party Opinion which is available on the bank’s
green bond website. The Second Party Opinion refers to the whole Green Bond Program
and includes every security that is issued under it.

V.2 Annual Re-verification

oekom or any other party appointed by Berlin Hyp later as a successor for oekom in the
future will issue a report verifying the compliance of all issued bonds with the criteria
documented in this program on an annual basis. These reports will show the results of the
assessment of the sustainability performance of the program and the issued Green
Pfandbriefe and Green Senior bonds. They will be published on the bank's green bond
website.
Annex 1: Eligibility Criteria for the Selection of Eligible Assets

Green Buildings means energy efficient commercial real estate buildings with an energy demand or consumption that should not exceed:

<table>
<thead>
<tr>
<th>Property type</th>
<th>Energy demand Heating kWh/(m²*a)</th>
<th>Energy demand Electricity kWh/(m²*a)</th>
<th>In total kWh/(m²*a)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential</td>
<td>60</td>
<td>-</td>
<td>60</td>
</tr>
<tr>
<td>Office</td>
<td>100</td>
<td>80</td>
<td>180</td>
</tr>
<tr>
<td>Retail</td>
<td>60</td>
<td>75</td>
<td>135</td>
</tr>
<tr>
<td>Hotels</td>
<td>95</td>
<td>60</td>
<td>155</td>
</tr>
<tr>
<td>Logistics buildings</td>
<td>30</td>
<td>35</td>
<td>65</td>
</tr>
</tbody>
</table>

Derived from the German Energy Savings Regulation (EnEV)\(^2\) and subject to the annual re-verification by oekom, these reference values provide the basis of our eligibility criteria. They reference to the final energy demand. If, in certain cases, the use of modern technology at/in the building (for example block power stations, heat recovery power units, etc.) results in a significant reduction of primary energy demand, the primary energy demand value can be used as an alternative.

The eligibility criteria must be fulfilled additively, which means that the main decision criterion is the sum of the energy demand of heating and electricity (shown in the column "In total" in the table above). In order to prevent buildings with energetically poor building envelopes or a disproportional power requirement from being included in the green finance portfolio, the maximum values per energy demand category may not exceed the respective category threshold by more than 20% (excluding for residential).

In addition/alternatively, eligibility criteria include the following external sustainability certifications\(^3\):

- **LEED** Gold or above
- **BREEAM** Very Good or above
- **DGNB** Gold or above (for certificates given until 30.06.2015: Silver or above)
- **HQE** High Level or above

---

\(^2\) [https://www.bundesanzeiger.de/ebanzwww/wexsservlet?page.navid=to_bookmark_official&bookmark_id=aw0alBTbc06YyZcam0E](https://www.bundesanzeiger.de/ebanzwww/wexsservlet?page.navid=to_bookmark_official&bookmark_id=aw0alBTbc06YyZcam0E); Based on third-party energy consultant data, Berlin Hyp decided 2018 to further strengthen the category thresholds in order to reflect Berlin Hyp’s long term strategy and its specific asset portfolio.

\(^3\) LEED, BREEAM, DGNB and HQE are providers of sustainability certificates for buildings. Buildings financed by Berlin Hyp after issuance of its inaugural Green Pfandbrief on 27 April 2015 have to score at least 50 per cent in the energy efficiency component of the green building certificate if the building does not qualify already by its energy demand or consumption as defined above.
Eligible assets shall also meet other environmental and/or social criteria. These assets are not to be used for the production of arms, pesticides, tobacco, pornography, nuclear power, coal, oil and fossil fuels.
