

Berlin Hyp AG

Key Rating Drivers

Savings Banks' Support Drives Ratings: Berlin Hyp's ratings are underpinned by Fitch Ratings' view of the extremely high probability of support, if needed, from the bank's ultimate parent, Sparkassen-Finanzgruppe (SFG, A+/Stable/F1+). SFG, the German savings banks group, collectively owns Berlin Hyp's immediate parent, Landesbank Berlin Holding AG (LBBH).

Improved Risk Profile: The upgrade of Berlin Hyp's Viability Rating (VR) to 'bbb+' from 'bbb' mirrors the upgrade of its risk profile, which reflects continued strengthening before the pandemic and easing pandemic-induced risks. We have also revised the outlook on the bank's asset quality and profitability to stable from negative to reflect its strong loan quality and more resilient profitability than initially expected through the pandemic.

Strong Asset Quality: Berlin Hyp's low non-performing loan (NPL) ratio of 0.3% at end-1H21 is significantly stronger than most peers' and the German banking sector average. We expect the ratio to stay below 1% in the medium term, but the bank's focus on commercial real-estate (CRE) lending with inherently high loan concentrations constrains our assessment of its asset quality.

Profitability Recovering: Berlin Hyp's operating profit/risk weighted assets (RWA) rose to an unsustainably high 2.7% in 1H21 from 0.9% in 2020 amid benign funding conditions including large drawings on the ECB's TLTRO and the absence of loan impairment charges. We expect operating profit/RWA to revert toward its long-term average of 1.5% over the next two years.

Stable, Adequate Capitalisation: We expect Berlin Hyp's common equity Tier 1 (CET1) ratio (slightly down to 13.3% at end-3Q21 due to loan growth) to stay close to 13%, which is adequate for the bank's risk profile and well above its regulatory requirement of 8.1%. We adjust the implied capital score negatively to reflect the concentration on relatively large CRE loans. The bank is likely to continue to retain most of its profits to match the long-term RWA inflation driven by the future implementation of the Basel III output floor.

Sound Funding and Liquidity: Berlin Hyp is wholesale funded, mostly through Pfandbriefe and unsecured debt. Thanks to Berlin Hyp's membership in SFG's institutional protection scheme (IPS), investments by SFG's members in the bank's unsecured debt benefit from a 0% regulatory risk weight. This ensures Berlin Hyp privileged access to SFG's vast excess liquidity.

Rating Sensitivities

New Owner: Berlin Hyp's Issuer Default Ratings (IDRs) are primarily sensitive to changes in SFG's IDRs or a weakening of SFG's propensity to provide support. This could result from changes to Berlin Hyp's ownership or to its membership in the IPS.

Asset Quality, Profitability Pressure: Berlin Hyp's VR offers moderate headroom under downside scenarios to our baseline forecast. We could downgrade the VR if we expect severe and sustained pressure on the performance of CRE markets to durably weaken the bank's four-year-average NPL and operating profit/RWA ratios to above 3% and below 0.8%, respectively. The bank's focus on CRE lending makes an upgrade of the VR unlikely in the foreseeable future.

Debt Rating Classes

Rating level	Rating
Deposit rating	AA-/F1+
Senior preferred (SP) debt	AA-/F1+
Senior non-preferred (SNP) debt	A+

Source: Fitch Ratings

Berlin Hyp's SNP debt rating is aligned with its Long-Term IDR, and its long-term SP debt and deposit ratings are one notch above its Long-Term IDR. This reflects its large buffer of SNP debt equivalent to 43% of its RWA at end-1H21, which protects preferred creditors relative to non-preferred creditors in a resolution. The short-term SP debt and deposit ratings of 'F1+' are the only options mapping to the respective long-term ratings.

Adjustments to Implied VR Scores

The asset quality score of 'bbb+' has been assigned below the 'aa' category implied score, to reflect Berlin Hyp's high risk concentration resulting from its monoline, domestic CRE focused business model, with high sector property type exposures and some large individual loans.

The earnings and profitability score of 'bbb' has been assigned below the 'a' category implied score, to reflect the bank's low revenue diversification, resulting from high reliance on a single business line and its relatively low fee income. The capitalisation and leverage score of 'bbb+' has been notched down from the 'a' category implied score, reflecting the cyclicity of the CRE asset class, typical for the risk profile and business model of a monoline lender. The funding and liquidity score of 'bbb+' is substantially above the 'b & below' category implied score, to reflect Berlin Hyp's access to liquidity and ordinary support resulting from its integration into SFG.

Significant Changes

Improved Economic Prospects

Near-term pandemic-related risk has receded thanks to the extensive state support to the economy. CRE markets recovered globally in 1H21 as investments rebounded in most regions. Transaction volumes are close to pre-crisis levels and yields should stabilise after a compression in 2020. In Germany, CRE investments of EUR34 billion in 1H21 (-20% yoy) still lag behind the high pre-pandemic levels. Thirty-five percent of domestic investments are from foreign buyers, whose demand remains strong thanks to the perception of the German economy as a relatively safe haven with sound market fundamentals for long-term investments. The strong demand also reflects moderate property valuation by international comparison despite rapid price increases.

Ownership Under Review

SFG is considering several options to restructure Berlin Hyp's ownership. The bank could be sold to a member of SFG's IPS, or its ultimate ownership structure could remain unchanged. SFG's IPS members Landesbank Baden-Wuerttemberg (A-/Stable/F1), Landesbank Hessen-Thueringen Girozentrale (A+/Stable/F1+) and DekaBank Deutsche Girozentrale have expressed their interest. We could notch Berlin Hyp's Shareholder Support Rating (SSR) from its new owner's Long-Term IDR. If the latter is lower than SFG's Long-Term IDR, this could result in a downgrade of Berlin Hyp's SSR, IDRs and debt ratings. Diverging interests within SFG could delay the decision into 2022.

Robust Performance through Pandemic Supported by Strengthened Risk Profile

Berlin Hyp's conservative risk appetite rests on an established risk management framework and prudent underwriting standards including stricter requirements for foreign exposure. The savings banks' focus on stability, quality investments in core assets in domestic prime locations and moderate loan-to-value ratios have largely prevented negative rating migrations. Prudent asset selection in recent years has led to smaller exposure than peers to retail properties (15% of total loans at end-1H21) and hotels (below 5%), which are the most vulnerable to the pandemic.

Management Team Partially Renewed

The management team was partially renewed over the last 18 months, with the hiring of a chief marketing officer completing the executive board in May 2021.

Brief Company Summary and Key Qualitative Assessments

CRE Lender Integrated into the Savings Banks Organisation

Berlin Hyp is SFG's specialised, though not exclusive, CRE lender, and operates predominantly in Germany. It accounts for less than 3 % of SFG's total assets, but its product range allows the savings banks to participate in collateralised lending outside their regions without violating the savings banks laws that restrict their operations to their local areas. Berlin Hyp's established and intensifying cooperation with savings banks supports its cohesion with SFG and enhances its loan origination potential.

Moderate Exposure to CRE Markets in the EU

Berlin Hyp primarily focuses on lending to core domestic CRE types, with a stable strategic mix of investment and development financing in more resilient regions (including larger cities). The risk/return profile of the loans originated in recent years appears reasonable and consistent over time, despite the intense competition. The bank avoids asset classes not identified as core areas of expertise. Its risk appetite also benefits from conservative eligibility criteria for German covered bonds, which are its primary funding source.

Berlin Hyp's foreign lending focuses on lower-risk properties in capital regions in the EU, with reasonably prudent underwriting standards and stricter requirements than for domestic loans. Its asset quality has benefitted from a low exposure to the UK (less than 3% of total loans at end-1H21), which proved more volatile during the pandemic and in the context of Brexit.

Berlin Hyp is significantly more exposed than domestic peers to development loans (15% of new lending in 1H21), which we generally consider higher risk and more cyclical than cash flow-producing investment properties. However, the share of development loans has gradually declined from 23% at end-2016, and the book has performed well through the pandemic so far.

We expect SFG's risk-averse culture to ensure that Berlin Hyp will maintain its prudent risk appetite. We notably believe that the savings banks, whose operations are purely domestic, are particularly conservative when approving Berlin Hyp's foreign strategy. An independent advisory council that includes savings banks' board members monitor the bank's operations. Material changes to Berlin Hyp's risk standards or strategic priorities require SFG's approval.

Dedicated Sustainability Targets

Berlin Hyp has developed its sustainability framework in recent years and targets a third of its loan portfolio qualifying as 'green' (i.e. buildings compliant with energy-efficiency criteria such as energy consumption thresholds) by end-2025 (20% at end-2020). In April 2021, it became the first bank globally to issue a EUR500 million sustainability-linked bond. Failing to cut the carbon intensity of the bank's loan portfolio by 40% from 2020 to 2030 would trigger a step up on the final coupon. The issuance of green and sustainability-linked bonds under its respective frameworks helps Berlin Hyp expand its already diversified investor base outside SFG.

Key Financial Metrics – Latest Developments

NPLs Could Rise Moderately in 2022

We believe the low NPL ratio is not sustainable in the longer term. We expect a moderate rise in 2022 due to lagging effects of the pandemic as state support is being phased out, and because the loan book is exposed to tail risks in the CRE market. The current resurgence of the pandemic is adding to the short-term uncertainty. In addition, the pandemic accelerates structural trends, including lower office demand due to the progression of agile working, and the secular shift to online shopping, which could weigh on the quality of CRE asset in the longer term.

Net Interest Income Dominates Revenue; Low Funding Costs Support Profitability

Berlin Hyp's low funding costs benefit from its membership in SFG's IPS and mitigate the low lending margins that result from the competitive pressure in the German CRE market. Low margins are likely to weigh on revenues beyond the pandemic, because new business is likely to remain predominantly domestic. Berlin Hyp's cost efficiency is reasonable. The gradual rise in costs in 1H21 relates mainly to investment in IT, but also to higher staff and regulatory costs.

CRE Focus Exposes Bank to RWA Inflation from Basel IV

We believe the Basel IV output floor that will be phased in by 2029 could inflate Berlin Hyp's RWA by up to 20%. This is significantly above the average expected for the banking sector, due to the bank's focus on income-producing CRE lending and use of internal rating models, which drive its relatively low RWA density of 30% at end-1H21. Berlin Hyp will continue to build up its capital by allocating a significant portion of its operating profits to its reserves for general banking risks (EUR157 million in 9M21) to match the regulatory RWA inflation ('Other non-operating items' in the income statement overleaf). We believe SFG would inject capital if a prolonged and severe downturn prevented sufficient profit retention.

Opportunistic Use of ECB Facilities Enhances Funding and Liquidity Profile

Berlin Hyp's extensive use of the ECB's TLTRO amounted to about a quarter of its total funding at end-1H21 and temporarily inflates its liquidity buffer and Liquidity Coverage Ratio (LCR). We expect the LCR to decline gradually as the bank deploys some excess liquidity for new lending and liability management. Besides cash, Berlin Hyp's liquidity reserve included EUR6.6 billion of high-quality securities at end-3Q21, predominantly government (46%) and covered (37%) bonds. Senior unsecured bonds (including corporates) account for 11% of the portfolio. Germany (52%), France (16%) and Scandinavia (10%) are the main regions.

Shareholder Support Rating

Berlin Hyp's SSR reflects our view of SFG's very high propensity of support, because the savings banks' reputation and the IPS's credibility would be greatly damaged if SFG failed to support the bank. Given the bank's small size relative to SFG, and SFG's strong financial profile, any required support would most likely be immaterial for SFG.

How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The left-hand box shows the aggregate E, S, or G score. General issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies the [number of] general ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector and sub-sector ratings criteria and the General Issues and the Sector-Specific Issues have been informed with SASB's Materiality Map.

Sector references in the scale definitions below refer to Sector as displayed in the Sector Details box on page 1 of the navigator.

Social (S)

General Issues	S Score	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	2	Services for underbanked and underserved communities; SME and community development programs; financial literacy programs	Company Profile; Management & Strategy; Risk Appetite
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security)	Operating Environment; Company Profile; Management & Strategy; Risk Appetite

Employee Wellbeing	1	n.a.	n.a.
Exposure to Social Impacts	2	Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core banking practices	Company Profile; Financial Profile

Governance (G)

General Issues	G Score	Sector-Specific Issues	Reference
Management Strategy	3	Operational implementation of strategy	Management & Strategy
Governance Structure	3	Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal /compliance risks; business continuity; key person risk; related party transactions	Management & Strategy; Earnings & Profitability; Capitalisation & Leverage
Group Structure	3	Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Company Profile
Financial Transparency	3	Quality and frequency of financial reporting and auditing processes	Management & Strategy

CREDIT-RELEVANT ESG SCALE	
How relevant are E, S and G issues to the overall credit rating?	
5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

Berlin Hyp's highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit neutral or have only a minimal credit impact, either due to their nature or the way in which they are being managed by the bank. For more information on our ESG Relevance Scores, visit www.fitchratings.com/esg.

The ratings above were solicited and assigned or maintained at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors and underwriters for rating securities. Such fees generally vary from US\$ 1,000 to US\$ 750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$ 10,000 to US\$ 1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
